

# Military Grade Shipboard Power Supplies

- Mid-Eastern has been a leader in the building of Array Power Supplies since 1974. Mid-Eastern has built and continues to support a wide variety of fixed and towed array power supplies used by the military.
- Our arrays are employed on submarines such as Los Angeles, Sea Wolf, Trident and Virginia Class. It is also employed on destroyers and cruisers.
- Mid-Eastern is uniquely structured to meet the challenges presented by increasing needs for higher voltage, lower noise, more advanced control and improved status monitoring for today's power supplies and power systems.

MODEL: 94C249E

## MODEL IDENTIFIED AS DTAPS

- USED IN LOS ANGELES, SEAWOLF, VIRGINIA CLASS AND TRIDENT SUBMARINES.
- POWERS TB29, TB29A, TB23 & TB16
- SHIPBOARD QUALIFIED
- PURE LINEAR – NO SWITCHING OR PRE-REGULATION
- ISOLATED ANALOG PROGRAMMING & READBACK
- WATER COOLED

MODEL: 01C470A

## MODEL IDENTIFIED AS MFTA

- DEPLOYED IN ARLEIGH BRUKE CLASS DESTROYERS AND SOME CRUISERS
- SHIPBOARD QUALIFIED
- PURE LINEAR – NO SWITCHING OR PRE-REGULATION
- RS-485 PROGRAMMING WITH STATUS REPORTING AND CONTROL

MODEL: 09C582

## MODEL IDENTIFIED AS MFTA

- SIMILAR TO MODEL 01C470A
- USED IN REMOTE OFF SHIP ARRAY TESTING AT REMOTE LOCATIONS
- SHIPBOARD QUALIFIED
- PURE LINEAR – NO SWITCHING OR PRE-REGULATION
- RJ45 PROGRAMMING & READBACK
