

Modular Linear Power Supplies

- Modular Linear Power Supplies – Custom and "Or Equal" replacement Designs
- Mid-Eastern has built many "Or Equal" replacement power supplies meeting the physical and electrical requirements of legend units built by other manufactures.
- "Or Equal" means form, fit and function equality including any environmental requirements along with location of mounting holes, terminal location and sequence, and location of any adjustments.
- Many of these power supplies are sold by Mid-Eastern as approved replacement items with the same NSN as the original manufacturers units.
- We also provide these products to many primes such as Raytheon, Lockheed Martin as well as various US Govt. agencies to support Legend equipment in the military.
